Description

Sheath thermocouples comprise a thin-walled and flexible sheathed cable made of stainless steel or Inconel. The cable contains thermal wires embedded in pressed fireproof magnesium oxide.

Good heat transfer between sheath and thermocouple allows fast response times and high measuring accuracies. The vibration-proof design assures long service life.

The flexible probe tube allows temperature measurements at locations that are difficult to access. The minimum bend radius is 5 x outer diameter. The minimum mounting length is ≥ 50 mm for sheath diameter 0.5 to 2.0 mm; ≥ 100 mm for sheath diameter 3.0 to 6.0 mm.

Thermocouples according to IEC 584-1, category 2 are used in the measuring insert as standard. Thermocouples according to DIN 43 710 or other versions are also available upon request.

Applications

Because of their characteristics sheath thermocouples are used in difficult measurement applications with strong vibrations as well as at all measuring positions where flexibility and ease of replacement are needed.

Areas of application are to be found in chemical plants, power stations, motors, as well as in machine construction and building installations and in general industrial applications.

Standard plug connections with no thermal e.m.f. for temperatures from -60 to +200°C

Plug connections for thermocouples

No thermal e.m.f. is produced in the connections between thermocouples and compensating lead, when the contact

material is the same as the thermocouple material.

Clamp process connections

Clamp process connections for passing through sheath thermocouples with a pressure washer made of Teflon (up to

200°C, that can be removed) or a conical ring made of stainless steel (for higher temperatures and pressures).

Resistance Temperature Sensor

Special temperature measurement
for food applications

- Measuring range: -50 ... +250 °C
- Sensor Pt 100, accuracy class A
- p_{max} 10 bar, t_{max} 250 °C
- hygienic (acc. to EHEDG)
- variable mounting with different sleeves
- Sensor completely assembled from st. steel
- Optional with head mounted transmitter
- CIP/SIP-compliant
